INFORMATION IN THIS DOCUMENT IS PROVIDED IN CONNECTION WITH INTEL PRODUCTS AND IS "AS IS." NO LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE, TO ANY INTELLECTUAL PROPERTY RIGHTS IS GRANTED BY THIS DOCUMENT. EXCEPT AS PROVIDED IN INTEL'S TERMS AND CONDITIONS OF SALE FOR SUCH PRODUCTS, INTEL ASSUMES NO LIABILITY WHATSOEVER AND INTEL DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY, RELATING TO SALE AND/OR USE OF INTEL PRODUCTS INCLUDING LIABILITY OR WARRANTIES RELATING TO FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

Intel may make changes to specifications and product descriptions at any time, without notice. Designers must not rely on the absence or characteristics of any features or instructions marked "reserved" or "undefined." Intel reserves these for future definition and shall have no responsibility whatsoever for conflicts or incompatibilities arising from future changes to them. The information here is subject to change without notice. Do not finalize a design with this information. The products described in this document may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

All products, computer systems, dates and figures specified are preliminary based on current expectations, and are subject to change without notice. All dates specified are target dates, are provided for planning purposes only and are subject to change.

Code names featured are used internally within Intel to identify products that are in development and not yet publicly announced for release. Customers, licensees and other third parties are not authorized by Intel to use code names in advertising, promotion or marketing of any product or services and any such use of Intel's internal code names is at the sole risk of the user.

Intel, Intel Inside, Intel Atom and Intel Core are trademarks of Intel Corporation in the U.S. and other countries.

Other names and brands may be claimed as the property of others.

NEED FOR IOT

The Internet of Things (IoT) is fueling innovation across a range of industries to optimize processes and increase efficiency.

Greater efficiency for HVAC systems, which account for 41% of U.S. building energy use.¹

SMART BUILDING

Energy use monitoring; sensors in heaters and chillers to find inefficiencies

Supermarket cost-to-sales ratios can be reduced 2% by automatic checkout.²

RETAIL

Point of sale, vending machines, supply chain

IoT can optimize energy grids, which lose ~6% during transmission and distribution.³

ENERGY

Environmental data logging, substation monitoring, grid efficiencies

Manufacturers using IoT report 82% increased efficiency and 49% fewer defects.⁴

INDUSTRIAL & MANUFACTURING

Assembly-line equipment reporting, inventory management; automation

Enhanced driver coaching can save nearly 7% on fuel costs.⁵

TRANSPORTATION

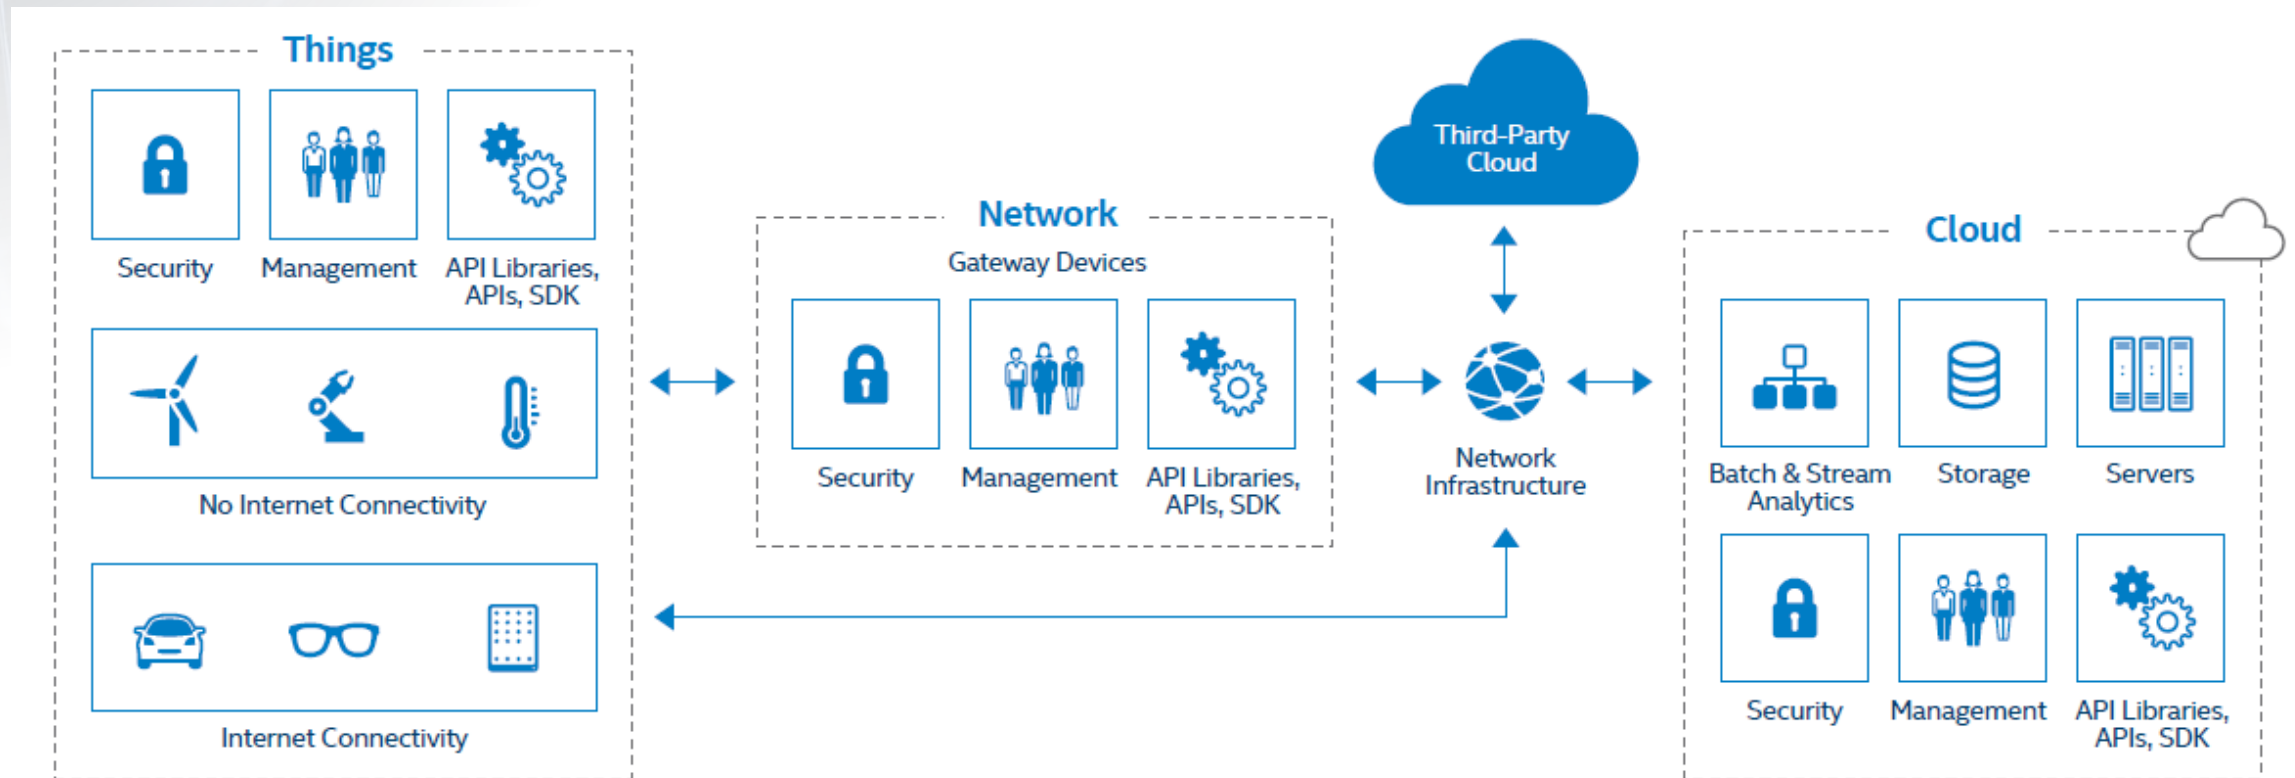

Fleet management, freight tracking, urban congestion management

INTEL® IOT PLATFORM

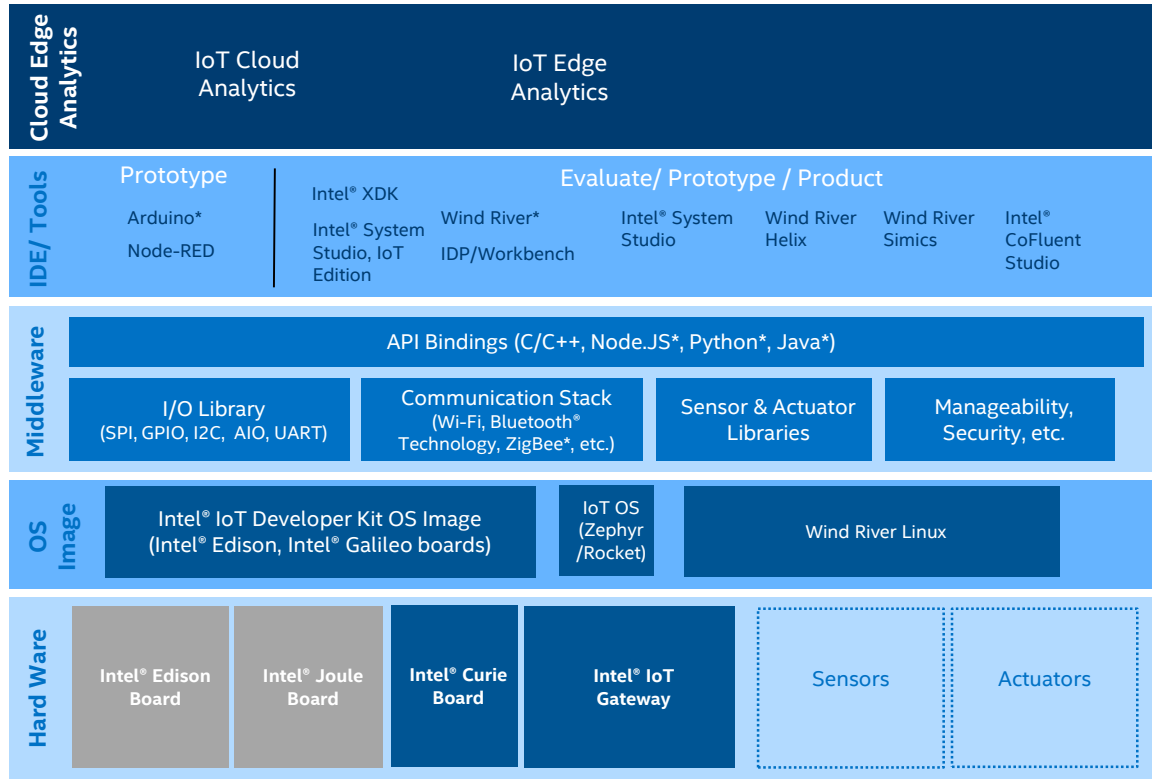

Endpoints, Gateways, Networks, and Cloud

INTEL® IOT DEVELOPER KIT

- Supports Intel® IoT Gateways, Intel® Edison, Intel® Joule & Intel MCU
- Middleware libraries for interacting sensors, actuators
- IDEs and tools to create, run, debug and optimize IoT solutions
- Arduino, C/C++, JavaScript, Python, and Java programming language support
- Advanced power & performance optimization tools
- Examples with Wind River Helix Cloud
- Deep hardware and software insights to speed up development, testing and optimization
- IoT cloud and edge analytics for data collection, visualization, and analytics

INTEL® IOT GATEWAY

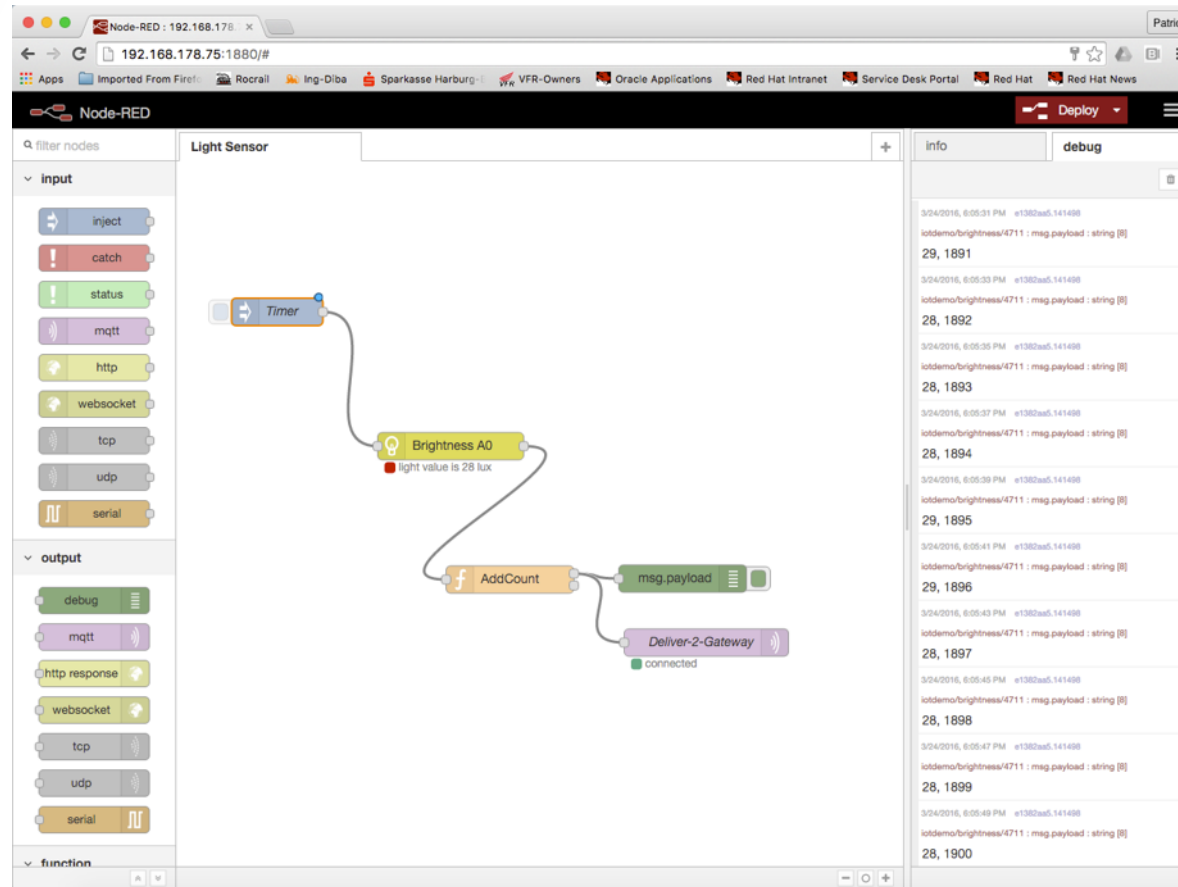

ARDUINO 101 (GENUINO 101)

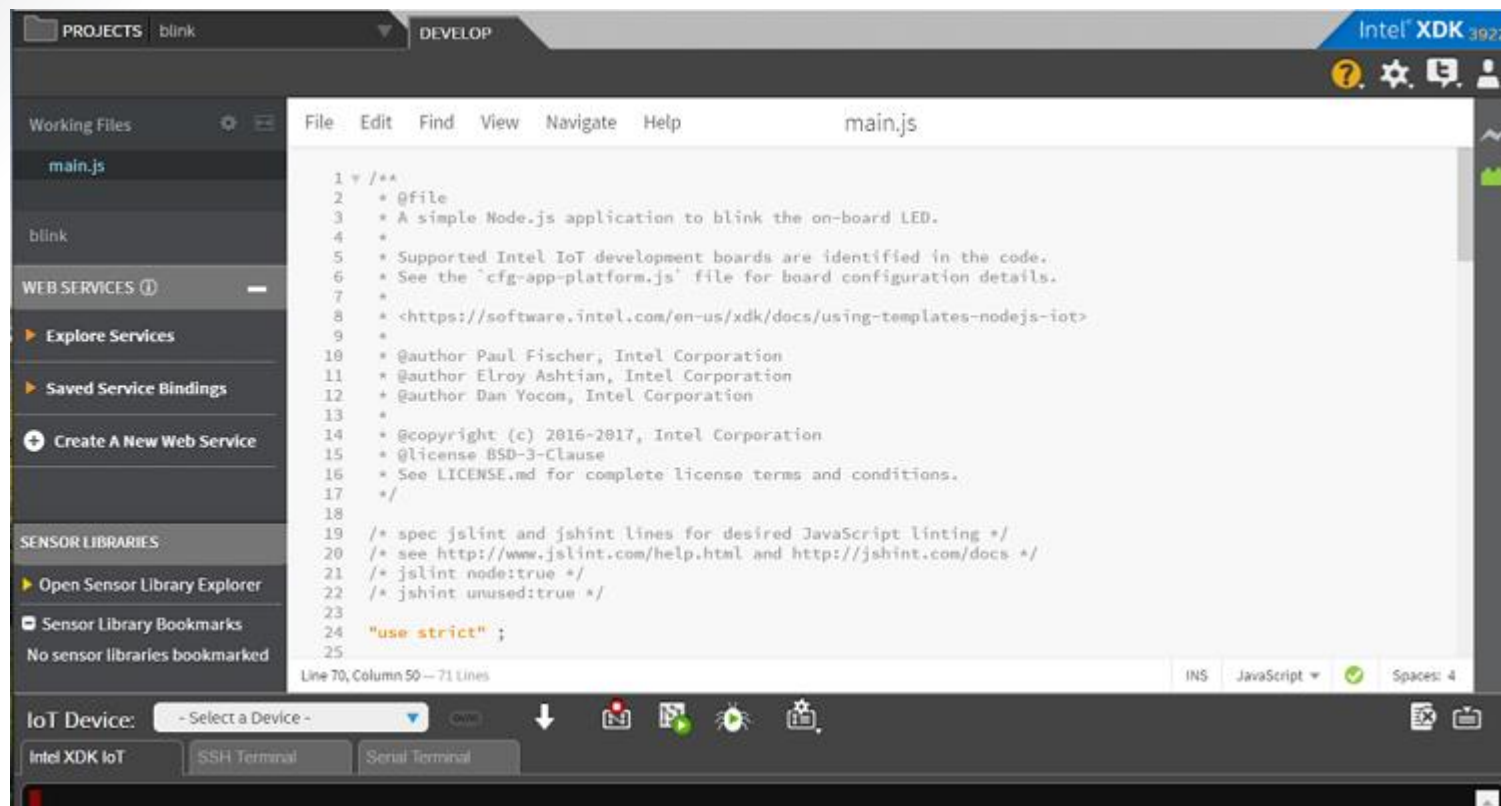

GROVE KIT

NODE-RED

MIDDLEWARE LIBRARIES

▪ MRAA

- Interface with the I/O on your board
- Developed in C/C++
- Has bindings to JavaScript, Python, Java and C/C++
- Open-source
- Available on Github

<https://github.com/intel-iot-devkit/mraa>

▪ UPM

- High-level repository for I/O interfacing
- Uses MRAA
- Has bindings to JavaScript, Python, Java and C/C++
- Open-source
- Available on Github

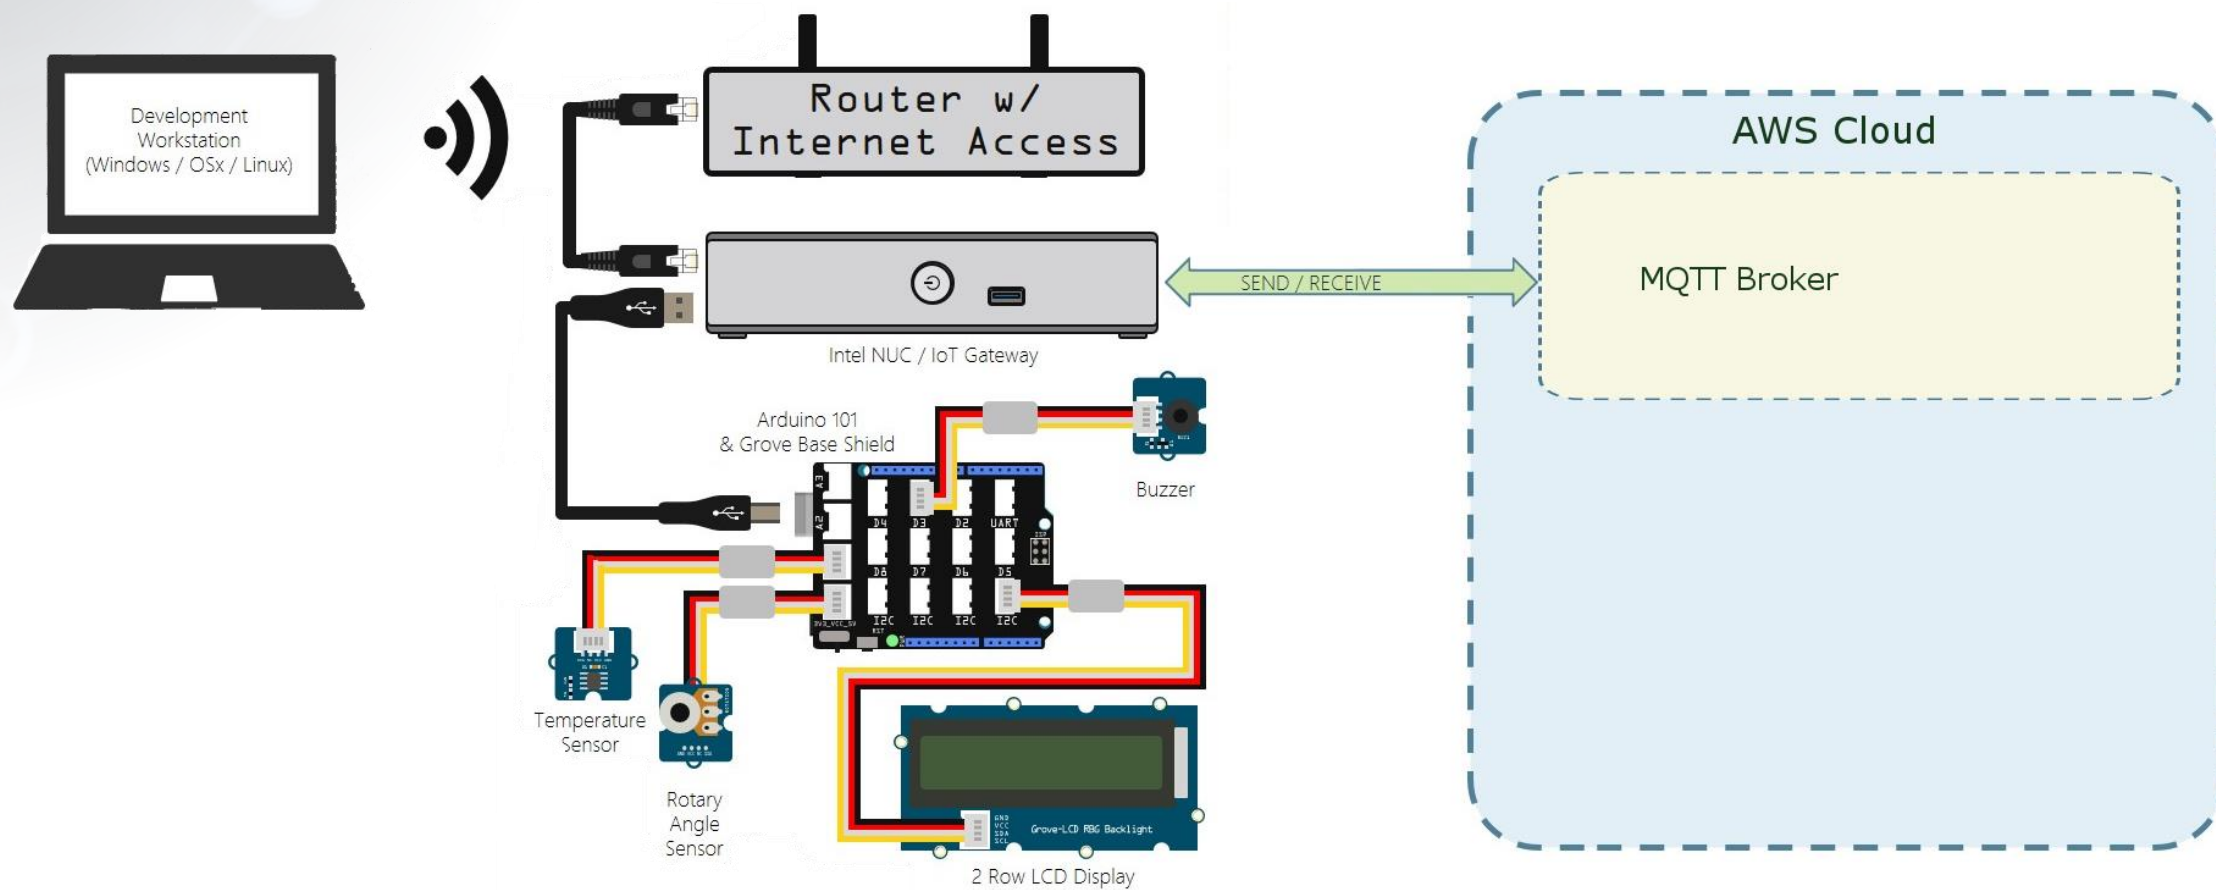

<https://github.com/intel-iot-devkit/upm>
